DETAILED ACTION

This Office Action is in response to amendment filed March 27, 2006. Claims 1-9 are presented for further examination.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Berrada et al. (hereinafter "Berrada", US Patent 6,151,329).

As per claim 1, Berrada discloses a method for posting a message on a message list accessible to a plurality of processors, said method comprising:

- Selecting a new-message slot (column 1, lines 45-50, column 3, lines 54-58);
- Placing said message in said new-message slot (column 4, lines 17-21).
- Modifying said new-message slot to specify an intended recipient of said message, said intended recipient being selected from said plurality of processors (column 2, lines 32-42, column 4, lines 38-45).

Art Unit: 2157

As per claim 2, Berrada discloses the method of claim 1 further comprising inserting said new-message slot into said message list, said message list including a first existing-message slot having a pointer to a second existing-message slot (column 3, lines 20-24).

As per claim 3, Berrada further discloses the method of claim 2 wherein inserting said new-message slot into said message list comprises setting a first pointer on said new-message slot to point to said first existing-message slot and a second pointer on said new-message slot to point to said second existing message-slot (column 4, lines 1-10).

As per claim 4, Berrada discloses the method of claim 3 wherein inserting said new-message slot into said message list further comprises setting said pointer associated with said first existing-message slot to point to said new-message slot (column 4, lines 60-67)

As per claim 5, Berrada discloses the method of claim 1 wherein modifying said new-message slot to specify an intended recipient comprises modifying a destination mask associated with said new-message slot, said destination mask including information specifying all intended recipients of said message (column 4, lines 38-45).

Art Unit: 2157

As per claim 6, Berrada further discloses the method of claim 5 wherein modifying said destination mask comprises

- Selecting, from a plurality of constituent data-elements of said destination mask, each of said constituent data-elements corresponding to one of said processors from said plurality of processors, a selected data-element corresponding to a selected processor (column 3, lines 23-30);
- Modifying said selected data-element to indicate that said selected processor is an intended recipient (column 4, lines 15-20).

As per claim 7, Berrada discloses the method of claim 1 further comprising updating a message directory to indicate the presence of said new-message slot in said message list, said message directory being accessible to said plurality of processors (column 3, lines 23-30).

As per claim 8, Berrada discloses the method of claim 7 wherein updating said message directory comprises updating an attention mask containing information indicative of which processors from said plurality of processors are intended recipients of messages contained in said message list (column 4, lines 47-65).

As per claim 9, Berrada discloses the method of claim 7 wherein updating said attention mask comprises:

- Selecting from a plurality of constituent data-elements of said attention

Art Unit: 2157

mask, each of said constituent data-elements corresponding to one of said processors from said plurality of processors, a selected data-element corresponding to a selected processor (column 4, lines 25-30);

- Modifying said selected data-element to indicate existence of a new message for which said selected processor is an intended recipient (column 4, lines 35-45).

Response to Arguments

Applicant's argument has been considered but is moot in view of the new ground(s) of rejection.
